

# COSTELLO

## ***FOR IMMEDIATE RELEASE***

**R. C. Costello & Assoc., Inc. (COSTELLO) launches new website to celebrate their 16<sup>th</sup> anniversary in the process engineering business, [www.rccostello.com](http://www.rccostello.com)**

REDONDO BEACH, CA – May 20, 2011. -- COSTELLO has launched its new information-based website, at <http://www.rccostello.com>.

The dramatically redesigned site, created by the company's in-house design team, embodies the engineering firm's forward-thinking vision and commitment to the growing needs of its clients and the world.

"We implemented our belief in using cutting-edge technology in all aspects of engineering with the availability of new web technology. It was time for a comprehensive restructuring of the online window to COSTELLO's services. It will greatly improve the experience of our clients as we move ahead into new realms of [chemical process engineering](#)," said the company's president, Rocky Costello.

This launch lays the groundwork for a philosophy of ongoing evolution and expansion of [www.rccostello.com](http://www.rccostello.com) with new features and improvements such as:

- Rich content provided by trusted sources from across the many chemistry and engineering platforms
- Direct access to comprehensive engineering guides and tools
- Streamlined internal searching and more intuitive navigation
- Illustrative videos using multimedia to show how new and innovative technologies work
- Interactive blogs to stay connected and get the latest news from the chemical engineering community

The company's site welcomes clients with a clean uncluttered design, and features content centered on COSTELLO's mission to inspire new and emerging technologies for chemical plant design, [biofuels plant design](#) and [process safety](#).

### **About COSTELLO**

COSTELLO provides industry on a worldwide basis with quality chemical and environmental engineering services, advanced and emerging process technologies, and [regulatory compliance support](#) that optimizes client expenditures and manpower requirements. COSTELLO is also the West Coast representative for

[ChemCad](#) process simulation software.

We look forward to feedback from our clients and the opportunity to share exciting new developments to come. Please continue to visit our site for updated information and to stay connected to the engineering community.
